

XOXOeSIM

eSIM

A few clicks and the package is yours!

First of all, make sure that you have an internet connection in order to set up your eSIM.

Go to "Settings" > Select "connections"

Select "SIM card manager"

Select "Add mobile plan"

Your phone will search for available plans. when it's done, select "Scan carrier QR code"

Please scan the QR code included in your email

Select "Confirm", and the eSIM will be added

Turn on eSIM below "SIM card manager"

At "Mobile Data" select the relevant eSIM

Enable Data Roaming at the "Mobile networks" screen (We recommend turning off the Primary line if the homeland carrier is not necessary, in order to avoid extra charges - unless you want to use your primary line)

Now turn off the Wi-Fi to connect.

The data connection will be working only at the destinations covered by the package.
