

# XOXOWiFi

eSIM

**A few clicks and the package is yours!**

First of all, make sure that you have an internet connection in order to set up your eSIM.

Go to "Settings" > "Cellular"

Select "Add cellular/data plan"

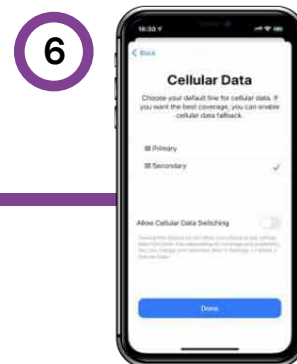

Scan the QR Code and Select "Add cellular/data plan" After downloading, set up your Secondary "line":

Choose a name for your "line": you can select "Secondary" > or you can name your profile by > "custom label" and insert your name for the line.

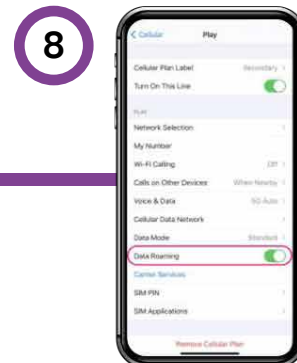

As default line select "Primary" line, same for iMessage, facetime & Apple ID, Except for Mobile Data - select "Secondary/travel" if you are already abroad.

Do not allow mobile data switching.

Go to Settings > "Cellular/mobile Data" > select "secondary/ Travel line"

Activate "Data Roaming" inside the "Secondary/ travel"

\*\*We recommend turning off the Primary line if the homeland carrier is not necessary, in order to avoid extra charges. (unless you want to use your primary line) **Now turn off the Wi-Fi to connect.**

The data connection will be working only at the destinations covered by the package.
